

CAE Healthcare Platinum Series Sticky Wounds

CAE Healthcare Platinum Series Sticky Wounds

Artificial wounds are ideal for teaching learners to properly administer first aid, apply bandages and perform other procedural skills related to wound care.

CAE Healthcare's platinum series of sticky wounds adhere securely, yet remove easily for convenient and repeated use. Flexible and designed to last, these wounds are skin-color matched for [CAE Juno](#) and [CAE Ares](#) manikins, providing an added layer of realism to healthcare training.
