iRIS

The Intuitive, Collaborative, Simulation Authoring Platform

iRIS is a unique web-based platform to help you design high quality scenarios and offer the best learning experience possible, as well as helping you get the best value from the investments you have made in simulation resources.

| WHAT DOES IRIS OFFER?	HOW IRIS BENEFITS YOU?
Time and cost-saving simulation-based education	Reduce the time and effort required for designing and authoring scenarios
Intuitive software solution where course developers can author rapidly and efficiently together	Driving interprofessional collaboration
Simple implementation with sharing options across networks or institutions	Building engagement with a wider range of Subject Matter Experts to harness their expertise in developing new scenarios
A library of ready-to-use course content including all resources, faculty notes and manikin data	Providing a central repository from which to store and manage your scenarios safely
A secure online platform enabling best practice methodologies in simulation education	Ensure content is developed in standardised, high quality manner

Your worldwide training partner of choice

1/12 Description & Classification (edit)

2/12 Learning Needs & Objectives (edit)

3/12 Faculty Script & Patient Profile (edit)

4/12 Scenario Setup - Faculty, Roles, Location, Simulator, Monitors (edit)

5/12 Respiratory Equipment Checklist (edit)

6/12 Vascular Access, Moulage & Other Medical Equipment Checklists (edit)

7/12 IV Fluids and Medications Checklists (edit)

DESIGN ➤ DEVELOP ➤ IMPLEMENT

> **"** Thanks to iRIS we have been able to achieve **equity of access** to **high quality educational material** whilst creating a system that allows **educational governance, collaborative development** of high quality educational material and **sharing of resources**. iRIS **addresses the re-inventing the wheel phenomenon** that often exists in the Simulation and Education community.
>
> Dr David Grant, Chair, Bristol Medical Simulation Centre. **"**
