

# CAE Vimedix

The most comprehensive and easy-to-use ultrasound simulator

## New software update available!

**CAE Vimedix 3.1** allows flexibility for remote learning while your simulation lab is distancing or closed. With a library of more than 200 pathologies, we offer new capabilities for virtual lectures with quick lesson building, complementary ICCU e-learning, and interactive, hands-on practice with a remote manikin and ultrasound probes.

With the addition of HoloLens mixed reality, we can truly deliver an immersive experience that will engage your learners while elevating their understanding of anatomy and clinical diagnosis.

**Remote learning capability**

**Enhanced instructional content**

**Access to ICCU elearning portal**

**Live instructor training with 3D anatomy**

For a limited time, we're offering a free one-year warranty with the purchase of an upgrade to Vimedix 3.0 or above.
