

# iRIS Health Simulation Authoring Platform

Scenario development made easy

iRIS is a web-based scenario development solution that helps in easy collaboration, design and development of high quality training scenarios.

## Develop high quality and standardized content across simulators, disciplines and locations

- Develop scenarios with an easy step-by-step wizard
- Virtually collaborate with peers and subject matter experts to develop scenarios
- Improve scenario quality with best practice references (INACSL, ASPE, ASPIH, etc.)
- Seamlessly export scenarios from iRIS to simulators

“ Everything you need to create a scenario is just one click away. ”

**Kim Leighton**  
*Executive Director, ITQAN  
Clinical Simulation and  
Innovation Center,  
Hamad Medical Corporation,  
Past President, INACSL*

“ iRIS turns clinicians in to educators, without the need for one of us from the simulation team to constantly work with them face to face. Together we collaborate on-line, and it frees up our time. ”

**John Meyer**  
*Lecturer in Emergency  
Medical Sciences,  
Cape Peninsula University  
of Technology*

## Save time in simulation planning

- Collaborate with clinicians online and save time used in face-to-face meetings
- Reuse and share scenarios and best practices with 1,800+ simulation professionals
- Collate all simulation resources on one platform for quick access and retrieval
